Section D — Notes & explanation of variances

Revenue declined approximately 13% year-over-year on continued automotive-OEM order softness; two Tier-1 automotive customers moved to extended (75-day) payment terms at year-end, accounting for the majority of the 61–90 day receivables. The non-recurring legal & restructuring add-back ($800k) relates to a supplier contract dispute settled in Q4 2024. Owner/management compensation normalization ($700k) adjusts above-market compensation paid to the managing members to a market rate consistent with §1.01. Revolver utilization rose to 85% of the line, primarily to fund a working-capital build; management expects the aerospace subassembly program to provide a recovery inflection as the related firm purchase order converts to shipments in the second half of 2025.

Capitalized terms have the meanings assigned in the Credit Agreement. EBITDA adjustments are limited to add-backs permitted under the definition of “Adjusted EBITDA” in §1.01.

Appendix A — Scheduled debt amortization (next four quarters)

Period	Principal	Interest	Total	Ending balance
Q2 2025	1,675	760	2,435	40,800
Q3 2025	1,675	740	2,415	39,125
Q4 2025	1,675	720	2,395	37,450
Q1 2026	1,675	700	2,375	35,775

IN WITNESS WHEREOF, the undersigned has executed this Certificate as of the date written below.
